

If You Already Have an EHR System

If your practice has already chosen an EHR system, you will still need to redesign your workflow and processes so that they meet the requirements of meaningful use. We can assist you with these processes.

Functional Interoperability and Health Information Exchange (HIE) Services

- Ensure that your practice meets interoperability requirements.

Privacy and Security

- Ensure that your practice has a plan for remaining compliant with HIPAA after your implementation.

Meaningful Use/Clinical Quality Improvement Services

- Provide your practice with an understanding of meaningful use and a roadmap to meet the measures.
- Ensure that your vendor's EHR implementation and training plan supports reaching meaningful use.
- Work with your practice post-go live to refine workflow in accordance with meeting meaningful use.
- Assist with documenting that your practice has reached meaningful use.

Workflow Redesign Services

- Review and assess your practice's current workflow and provide redesign recommendations.
